

Committed Or Interested?

Study/Discussion Material for the Podcast from Sunday 2/15/2015

From Dennis Merrit Jones' *The Art Of Uncertainty*, page 127

“We already know the universe always says ‘Yes’ to that which we commit at the deepest level of our being. The decision that establishes a definite commitment really marks the beginning of a shift in consciousness. From this commitment the most ‘unforeseen’ of beneficent circumstances come our way. This is good news for those who walk the pathway of uncertainty, but it should be of no surprise to us—it’s how the Law of Cause and Effect works. We know we don’t have to control or manipulate the universe because It knows far better than we how to bring our deepest desire to us when we first do our part. One of the primary things required of us is commitment...”

Study/Discussion Questions:

1. What is the difference between “interest” and “commitment?” Think of some personal examples.
2. What is the “Law of Cause and Effect” and how is it affected by our commitment?
3. Does the Universe (God) care how big your dream is? How can it support your commitment regardless of size, complexity or human difficulty?
